

RG-128-1

TSO APPROVED

24 Volt Aircraft Battery for Emergency Lighting & Back Up, Avionics, and More

Concorde RG® Series emergency batteries protect and extend the life of other avionics and are charged directly from the DC bus with no dedicated charger. This results in a high inrush current which extends battery life with fast recovery time from discharge. With the battery connected directly to the bus, transient spikes in the DC power are absorbed by the battery. Concorde Emergency Batteries are self regulating on charge and use only the current required to maintain them at full charge.

Recombinant Gas - The RG® Series are low resistance, valve regulated lead acid (VRLA) batteries.

- Maintenance free
- Constructed with non removable vent valves – no addition of electrolyte or water required
- Non spillable
- Shipped fully charged and ready to install
- Manufactured with absorbed glass mat separators (AGM)
- RG® Series batteries are the original AGM battery designed for the U.S. Military
- RG® Series batteries ship Hazmat Exempt

RG-128-1

- Maximum weight 11.2 LBS / 5.1 KGS
- Rated Capacity $C_1 = 3.8$ Ah

Connector Clocking Options (Insert Rotations) are Available

- Connector Types:
 - MS3120E14-5S
 - MS3120E14-5SW
 - MS3120E14-5SX
- Dual Output
 - PIN A: 7.5 Ah Circuit Breaker Output
